

# Chemicals A to Z

**Aluminum Sulfate:** Applying aluminum sulfate to your soil will make it more acidic. It will help turn Endless Summer and Twist N Shout Hydrangeas blooms blue. Also apply it to soil around acid loving plants like evergreens and blueberries.

**Bayer Insect Control Plus Fertilizer:** Use this product on potted houseplants to help fight off aphids and spider mites while giving your houseplants a kick of fertilizer to keep them healthy.

**Bayer 2 in 1 Rose & Flower Care:** This product is an all purpose fertilizer and insecticide for roses. It fertilizes and fights insects common to roses such as black spot, aphids, spider mites, Japanese beetles. Apply once per month.

**Biotone:** Biotone is applied to clay soils. It contains mycorrhizal which are beneficial bacterias and fungus. It will help to break down the clay in soil and restore the soil to a health state.

**Borer Miner Killer:** Apply to trees that are infected with borers. Commonly found on apple trees. Signs of borers are tiny holes in the trunk of the tree.

**Burn Out:** Burn out is an organic non-selective weed killer, similar to round-up.

**Eight:** Eight comes in a liquid or dust form and is a general purpose insecticide that can be used on outdoor plants only. It can be used to treat aphids, Japanese beetles, bagworms, leaf miners, and spider mites.

**Fish Emulsion:** Fish emulsion is an organic fertilizer that can be applied to your plants once per week. Please note that this product has a strong odor so you may want to apply it on windless days. It should be applied at the base of the plant.

**Fruit Tree Spray:** This spray works to fight diseases and insects that are common to fruit trees. Spray the entire tree seven to ten days after flowers have bloomed and stop the day before harvesting fruit.

**Fungonil:** General fungicide that treats things such as black spots on leaves, rust on leaves, powder mildew on leaves.

**Garden Lime:** Applying garden lime to your soil will make it more alkaline. It will help turn Endless Summer and Twist N Shout Hydrangeas blooms pink. Apply it to soil around clematis to help give them an extra boost. Also use it on tomato plants, its high calcium content will deter blossom end rot on tomato plants.

**Garden Dust:** Garden Dust is an insecticide and fungicide combined into one product and can be applied to veggies, fruit trees, shrubs, trees, and flowers.

**Hot Pepper Wax:** An organic spray that repels insects on fruits, vegetables, citrus, and ornamental plants. It works well for aphids, white flies, and scale.

**Insecticidal Soap:** Insecticidal soap is applied to houseplants that are infected with aphids or spider mites. It works effectively to get rid of soft bodied indoor insects on plants.

**Japanese Beetle Traps:** These traps are dual lure--containing both pheromes and a sweet smelling food that attracts Japanese beetles and then traps them.

**Kleen-Up:** Is a non-selective weed killer, similar to Round-Up.

**Liquid Fence:** A liquid spray that can be applied on plants that deer and rabbit are eating. Apply once a month to plants that are being eaten.

# Chemicals A to Z

**Miracle Gro:** For instant gratification, apply Miracle Gro to all types of plants. This multi-purpose fertilizer will help stimulate plant growth and flowering.

**Miracid:** Miracid is an acidic fertilizer that should be applied acid loving plants like evergreens and rhododendrons. It will also work to make Endless Summer and Twist N Shout Hydrangeas blooms blue.

**MoleMax:** MoleMax will help eradicate moles from your lawn. Mole Max is Castor Oil which is applied to your lawn. As it sinks into the soil moles will get it on their fur and they do not like this so they will to a new location.

**Osmocote:** This product comes in granular form and is a slow release fertilizer for annuals and vegetables. It will help your plants get established and perform better. Apply just one time during the season. Osmocote plus is the same as Osmocote but it is applied to perennials and shrubs, just one time per year.

**Preen:** Preen is a pre-emergent weed preventer, which it means it stops weed seeds from sprouting. It should be applied in the early spring months for best results. There is also organic Preen works just like the preen listed above but it is made with corn gluten. It is safe to apply in vegetable gardens after seeds have sprouted.

**Pruner Sealer:** Is used to seal wounds or cuts on trees. We recommend only using this product on severe wounds. In smaller wounds or cuts this product may actually increase the time it takes for a wound to heal.

**Repells All:** Spray on plants to deter deer and rabbits from eating them. It contains putrid ingredients that makes the plants taste bad to the animals.

**Rooting Powder:** Rooting powder can be used for starting soft and hard plants from cuttings. It helps to establish the roots more quickly when starting cuttings.

**Shake Away:** Is a granular critter repellent that contains predator repellents. The scent helps deter deer and rabbits from eating the plants. Apply two times a week for the first week and then two times per month for maintenance.

**Slug & Snail:** This granular product can be sprinkled around plants that slugs and snails are attacking to eradicate them. Slugs and snails typically forage on hostas and ligularia, leaving behind small holes.

**Thurcide:** This spray treats all types of caterpillars that can be found on trees, shrubs, and perennials. It is an organic bacteria that interrupts the digestive system of a caterpillar.

**Triple Phosphate:** Apply to plants to stimulate root growth and flowering.

**Tree Spikes:** Tree spikes are fertilizer for your tree. Apply one time per year in the fall after tree dormancy.

**Weed Beeter Ultra:** Is a selective broadleaf weed killer and can be applied to lawns to kill out broadleaf weeds (it will not kill grass). Weed Beeter Ultra Plus is the same as product listed above but it also kills crabgrass.

**Wilt Stop:** Apply to evergreen trees and shrubs in the late fall right before winter. It will help your evergreens retain moisture over the winter. It also works wonderful when sprayed on live Christmas trees to help lengthen the display time of the tree.
