

December

Project Checklist for December

- Mulch around any planted bulbs or tender perennials to add protection from the elements and squirrels.
- Remove the last of fall leaves.
- Rotate your houseplants indoors so they get enough light on all sides.
- Start paperwhite and amaryllis bulbs for beautiful winter blooms.
- Dress up your outdoor pots and planters by adding evergreen branches, red twigs, and holiday accents. The cool temperatures will keep the greens fresh and festive through the holidays.
- Think about getting a living holiday tree this year—an evergreen tree that can be replanted in your yard instead of being tossed out after the holidays.
- Cut uneven or low hanging branches from your holiday tree to create a swag of evergreen branches for your front door.
- Put gardening gifts on your holiday wish list.
- Make a list of to do projects for next year.

Create a holiday planter!

Create a beautiful holiday planter like this one by adding various types of evergreen branches and red twig dogwoods to one of your outdoor pots. You can also add holiday accents such as a string of lights, glittery accents, or holiday ornaments.
