

January

January Project List:

- Remove heavy snows from your evergreen branches to prevent branch breakage, but leave ice to melt.
- Remove holiday lights from trees and shrubs when there is no ice on them.
- Plan your garden for the year, think about what seeds you might need for perennials, vegetables, and annuals.
- Grow herbs indoors for cooking. Try the aero-garden that provides water & light in the right amounts so you can grow herbs, lettuce, tomatoes and more indoors.
- Trim your herbs to encourage growth right now.
- Go easy on the use of salt/ice melt around planting beds. Excessive amounts of salt can be harmful to plants.
- Inspect bulbs in storage for rot and throw away old ones.
- Read inspirational gardening books and dream of a warmer day.
